

## Using Skin Care Products while Pregnant or Breastfeeding?

Products containing potent acne fighting and anti-aging ingredients — like prescription retinoids, over-the-counter retinols, hydroquinone, benzoyl peroxide, and salicylic acid, to name a few — are not safe during pregnancy or breastfeeding. We recommend always consulting with your physician before using skin care products. Derma-Ceutix products that contain those ingredients are **Salicylic Cleanser, Glycolic Salicylic Astringent, Face Cleansing Pads, Retinol Cream (Vitamin A), Lifting & Pore Fortifying Cream, Acne Spot Treatment, & Acne Relief Mask.**
