

## **Why Should I Get Professional Treatments Done with my Local Esthetician if I am using Skin Care Products at home?**

Professionally provided Rejuvenation (chemical) peels are an important part of skin health. Derma-Ceutix peels are made from natural derivatives such as sugar cane & willow bark. As an effective treatment option for most skin types and concerns, they improve tone & texture, fine lines/wrinkles, hyperpigmentation, & acne.

These treatments will slough off the top layer of dead, compromised skin allowing your home care products to penetrate deeper into the skin to provide maximum results. We compare this combination to “Diet & Exercise” for the skin. You can get results from one or the other, but the pair provides the best, quickest results! Consult with your Local Esthetician to see what peel suits your skin type, lifestyle, and skin goals!
