

## **Why does Sunscreen need to be part of your Daily Skin Care Regimen?**

Sunscreen should be at the top of your skin care routine regimen! Daily and consistent use of sunscreen helps to prevent the development of fine lines and wrinkles, textural imperfections, and changes in the appearance of pores over time. Sunscreen is one of the most important tools you have in your skin care regimen! For optimal skin care results when using Derma-Ceutix products SPF needs to be part of your daily regimen 365 days a year, rain or shine!
